7. What aspects of the SocialEyes application could be improved?

When scrolling down posts the feed could scroll more naturally like how the browser scroll works rather than jumping between posts.

8. Any general comments surrounding the SocialEyes application?

On the fastest speed it was too easy to accidentally share a post or when commenting to hit the post comment button before the comment had been typed out.

I like that there was a good colour coding system to easily tell what social media the post was from and what it was about.

7. What aspects of the SocialEyes application could be improved?

Having the scrolling buttons slightly larger as well as the "precise movement" option buttons slightly larger.

8. Any general comments surrounding the SocialEyes application?

Picked it up very comfortably and the "type of post" colour coordination is a great feature. This quite clearly would improve the lives of those suffering from physical impairments, and even the able-bodied who want a more convenient browsing experience.

7. What aspects of the SocialEyes application could be improved?

I found it hard to select the pause menu at the top of the screen, this made selecting the movie and keyboard quite difficult.
Also the keyboard took some getting used to.

8. Any general comments surrounding the SocialEyes application?

I generally found the medium speed the easiest to get to grips with, but again this may be due to the fact that I had familiarised myself with the system by this stage.
